

Allocation of allowances from the New Entrants' Reserve 2013 – 2020

Updated on 15 January 2016 (next update foreseen for July 2016)

In the third trading period of the EU ETS, new installations and installations that increase their capacity are eligible for free allocation from the New Entrants' Reserve¹. Following such applications, the allowances are allocated to the installations for each year of the entire period as of their start and put in circulation annually.

Table 1 shows the number of applications for allowances from the New Entrants' Reserve as well as the amounts already in circulation and the amounts allocated for these installations the remaining years of phase 3. Table 2 shows the current status of the New Entrants' Reserve, comparing the initial amount and the amount still available.

Table 1: New Entrants' Reserve allowances allocated and put in circulation

Type of application	Number of installations	Put in circulation in 2013-2016 (in millions)²	Allocated for 2017 to 2020 (in millions)
New installations	138	9.2	8.5
Significant Capacity Extensions	259	39.5	37.3
Total	397	48.7	45.8

Table 2: Current status of the New Entrants' Reserve

	Allowances in millions	%
Initial New Entrants' Reserve	480.2	100%
In circulation or reserved for future allocation for 2013 – 2020	94.5	20%
New Entrants' Reserve Available	385.7	80%

¹ 5% of the overall ETS cap (around 780 million allowances) went into the New Entrants' Reserve for the third trading period. From this initial amount 300 million allowances were deducted for funding innovative low-carbon energy demonstration projects (the so-called NER300 programme).

² Allocations for 2016 will be put in circulation by the end of February 2016.

The tables are for information purpose only.
